

ALTAMASH AZAM

Technical Field Engineer | Networking & Infrastructure

Kolkata, WB, India | +91 7643946866 | altamash76azam@outlook.com
linkedin.com/in/altamash-azam-757120422 | github.com/Altamashazam7

CAREER OBJECTIVE

CCNA and CompTIA Network+ certified engineer with a strong foundation in networking fundamentals, IP addressing (IPv4/IPv6), LAN/WAN concepts, and optical fiber handling. Combines formal networking certification with hands-on infrastructure deployment and troubleshooting experience gained through internship and technical projects. Fully willing to travel across India for site installation, hardware configuration, and project coordination.

CERTIFICATIONS & TRAINING

- Cisco Certified Network Associate (CCNA) — Completed
- CompTIA Network+ — Completed
- Optical Fiber Basics & Handling Training — Completed

CORE TECHNICAL & DOMAIN SKILLS

Networking Fundamentals: IP Addressing (IPv4/IPv6), Subnetting, LAN/WAN Concepts, Routing & Switching, Network Topologies

Network Devices & Troubleshooting: Switch & Router Configuration, Connectivity Fault Finding, Latency Optimization, Diagnostics

Optical Fiber Basics: Cable Handling, Splice Jointing, Fiber Testing (OTDR/Power Meter exposure)

Infrastructure & Servers: Linux/Unix, Docker, Nginx, CI/CD Pipeline Automation

Site Operations: Technical Site Coordination, On-site Hardware Rollouts, Technical Documentation, Agile/Scrum

Scripting & Tools: Python, SQL, Bash Scripting, Git, REST APIs

TECHNICAL EXPERIENCE

Software Engineer Intern | DivSriVin Technologies — Remote (Chennai, India) Jan 2025 – Feb 2025

- Assisted in deployment, system monitoring, and network fault diagnosis, strengthening hands-on technical troubleshooting skills.
- Processed and validated over 45,000 subscriber data records across systems using SQL and Python automated pipelines.
- Implemented schema validation rules to prevent data loss during transformations, ensuring end-to-end system integrity.
- Collaborated with cross-functional technical teams to deliver production-ready workflows and remote monitoring tools.

INFRASTRUCTURE & DEPLOYMENT PROJECTS

CI/CD Deployment & Network Infrastructure | Docker, Nginx, GitHub Actions

- Automated a network deployment pipeline using Docker and Nginx configured as a load balancer and reverse proxy.
- Reduced deployment cycles from 25 minutes to 4 minutes (84% reduction) while maintaining zero network downtime.

Distributed Network Job Processor | Node.js, Redis, BullMQ, Docker

- Built a distributed worker node system to offload heavy processing from core servers, improving API response times by 45%.

EDUCATION

Bachelor of Technology (B.Tech) in Computer Science & Engineering

Budge Budge Institute of Technology, Kolkata | Expected 2027

ADDITIONAL DETAILS

Travel Readiness: 100% willing to travel extensively to project sites across India

Languages: English, Hindi, Bengali
